RE: Lichtenberg, Corey

To whom it Concern:

Corey Lichtenberg is a participant in the Augusta Judicial Circuit Adult Felony Drug Court Program. Per our policy, we screen for creatinine levels and specific gravity in urine to determine if flushing or internal adulteration has occurred. Per standard requirements of a drug rehabilitation program, urine creatinine levels at or below 20mg/dL or above 400 mg/dL and specific gravity (SpGr) at or below 1.003 or above 1.035 are considered to be an attempt to flush the system to cover drug use. Mr. Lichtenberg has received several abnormal creatinine levels as well as abnormal SpGr's maximum cutoff as follows:

- 07/23/2018 Creatinine 442.9 mg/dL with SpGr of 1.0360

In between these screens, Mr. Lichtenberg's creatinine are around 143 mg with SpGr within normal range. Mr. Lichtenberg has been directed to see a physician to determine if he is experiencing renal insufficiency to explain the inconsistent screens. Please provide a brief summary of your findings below as well as your signature and contact information.
