

Virtual Teacher Resources

1. This lesson is the second of a two-part series on garbage and recycling. These lessons are meant to help students develop an understanding of what many of the common items we use everyday are made and how recycling can help reduce waste.

[Garbage 2: Recycling Exercise](#)

2. This website provides K-12 students and educators with access to quality homework resources, lesson plans and project ideas for learning and teaching about the environment. Environmental education (EE) is a multi-disciplinary approach to learning about environmental issues that enhances knowledge, builds critical thinking skills, and helps students make informed and responsible decisions.

3. This activity is designed for second graders to help prepare for our school's Earth Day celebration. They will become experts on environmental issues we face today by using their research skills and strategies to discover important information about "Being Green".

[Earth Day Jigsaw Activity](#)

4. Measuring their dependence on nature on a typical day can give students a new understanding of the connection between personal lifestyle choices and the health of the planet
