REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Augusta-Richmond County Commissioners
Augusta, Georgia

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund and the aggregate remaining fund information of Augusta, Georgia as of December 31, 2010 and for the year then ended, which collectively comprise Augusta, Georgia's basic financial statements, as listed in the table of contents. These financial statements are the responsibility of the Augusta, Georgia management. Our responsibility is to express opinions on these basic financial statements based on our audit. We did not audit the financial statements of the Augusta-Richmond County Department of Health, Augusta-Richmond County Coliseum Authority or Downtown Development Authority, which represent three of the discretely presented component units. Those financial statements were audited by other auditors whose reports thereon has been furnished to us, and our opinion, insofar as it relates to the amounts included for the Department of Health, Augusta-Richmond County Coliseum Authority and Downtown Development Authority, is based solely on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the basic financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the basic financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall basic financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

In our opinion, based upon our audit and the report of other auditors, the basic financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund and the aggregate remaining fund information of Augusta, Georgia, as of December 31, 2010, and the respective changes in financial position and cash flows, where applicable, and the respective budgetary comparison for the General Fund and Fire Protection Fund for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated September 6, 2011 on our consideration of Augusta, Georgia's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and the schedules of funding progress and employer contributions be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management regarding the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Augusta, Georgia's basic financial statements as a whole. The combining and individual fund statements for the year ended December 31, 2010, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The combining and individual nonmajor fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied by us in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, based on our audit and the report of other auditors, the information is fairly stated in all material respects in relation to the financial statements as a whole.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Management's Discussion & Analysis (unaudited)

The Management's Discussion and Analysis of the Annual Financial Statements of Augusta, Georgia (the "Government") provides an overall narrative and analysis of the Government's financial statements for the fiscal year ended December 31, 2010. This discussion and analysis is designed to look at the Government's financial performance as a whole. Readers should also review the additional information provided in the transmittal letter, which can be found preceding this narrative, and the complete financial statements, with notes, which follow this narrative, to enhance their understanding of the Government's financial performance.

Financial Highlights

Key financial highlights for the year ended December 31, 2010 are as follows:

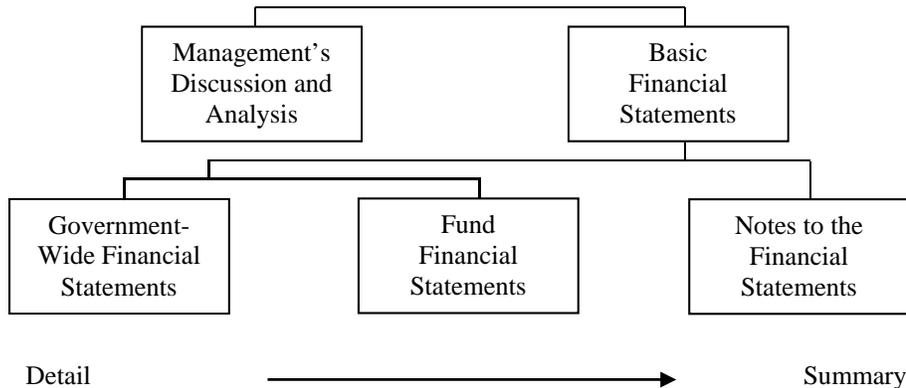

- The Government's combined net assets totaled \$871.9 million.
- The Government's total net assets increased by \$21.7 million, primarily due to capital spending funded by the Special Purpose Local Option Sales Tax revenues, federal aviation grants, and other tax revenues.
- As of the close of the current fiscal year, the Government's governmental funds reported combined ending fund balances of \$281.5 million, an increase of \$1.3 million from the prior year. Approximately 49% of this total amount, or \$139.4 million, is available for spending at the government's discretion (*unreserved fund balance*).
- At the end of the current fiscal year, total fund balance for the General Fund was \$32.8 million, or 27% of total General Fund expenditures for the fiscal year. Of this amount, \$4.4 million has been designated for other purposes, leaving \$28.4 million, or 87% of total General Fund balance, as undesignated.
- Combined Revenue totaled \$352.4 million, of which governmental activities totaled \$219.4 million and business-type activities totaled \$133 million. Current year revenues increased approximately 32.6% from those of the prior year.
- Overall expenses totaled \$319.7 million of which governmental activities totaled \$192.7 million and business-type activities totaled \$127.0 million. Current year expenses decreased approximately 5.2% over those of the prior year.
- Expenses of governmental activities exceeded program revenue by \$145.2 million, resulting in the use of general revenues (mostly taxes).
- Total Outstanding Long-Term Debt, excluding compensated absences, increased approximately \$37.9 million.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Government's basic financial statements. The basic financial statements consist of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. The basic financial statements present two different views of the Government through the use of government-wide statements and fund financial statements. In addition to the basic financial statements, this report contains other supplemental information that will enhance the reader's understanding of the financial condition of the Government.

Required Components of Annual Financial Report

Figure 1

Basic Financial Statements

The first two statements in the basic financial statements are the **Government-wide Financial Statements**. They provide both short and long-term information about the Government's financial status.

The next statements are **Fund Financial Statements**. These statements focus on the activities of the individual parts of Augusta, Georgia's government. These statements provide more detail than the government-wide statements. There are four parts to the Fund Financial Statements: 1) the governmental funds statements; 2) the budgetary comparison statements; 3) the proprietary fund statements; and 4) the fiduciary fund statements.

The next section of the basic financial statements is the **notes**. The notes to the financial statements explain in detail some of the data contained in those statements. After the notes, **supplemental information** is provided to show details about the Government's non-major governmental funds and internal service funds, all of which are added together in one column on the appropriate basic financial statements.

Government-wide Financial Statements

The Government-wide financial statements provide a broad view of the Government's operations in a manner similar to a private-sector business. The statements provide both short-term and long-term information about the Government's financial position, which assists in assessing the economic condition at the end of the fiscal year. These statements are prepared using the flow of economic resources measurement focus and the accrual basis of accounting. This means the statements take into account all revenues and expenses connected with the fiscal year even if cash involved has not been received or paid. The government-wide financial statements include the following two statements:

The **Statement of Net Assets** presents information on all of the Government's assets and liabilities, with the difference between the two reported as net assets. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the Government is improving or deteriorating.

The **Statement of Activities** presents information showing how the Government's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will not result in cash flows until future fiscal periods (e.g. uncollected taxes and earned but unused vacation leave).

This statement also presents a comparison between direct expense and program revenues for each function of the Government.

The government-wide statements are divided into three categories: 1) governmental activities, 2) business-type activities and 3) component units. The governmental activities include most of the Government's basic services such as general administration, judicial services, public safety, public works, health and welfare, culture and recreation, and housing and development. Property taxes and state and federal grant funds finance most of these activities. The business-type activities are those services that the Government charges a fee to customers in order to provide. These include Water and Sewer, Augusta Regional Airport, Waste Management, Municipal Golf Course, Transit, Daniel Field Airport, and Garbage Collection. The final category is component units. The Augusta-Richmond County Board of Health is a public health department. Although legally separate from the Government, the Government appoints a voting majority of the board. Augusta Canal Authority and Downtown Development Authority are also component units for which the Government is fiscally responsible.

Fund Financial Statements

A Fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Government, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

The fund financial statements focus on individual parts of the Government, reporting the Government's operations in more detail than the government-wide statements. All of the funds of the Government can be divided into three categories: governmental funds, proprietary funds and fiduciary funds. These fund categories use different accounting approaches and should be interpreted differently.

Governmental Funds

Most of the basic services provided by the Government are financed through governmental funds. Governmental funds are used to account for essentially the same functions reported as government activities in the government-wide financial statements. However, unlike the government-wide statements, these funds focus on how assets can readily be converted into cash and the amount of funds left at year-end that will be available for spending in the next year. Governmental funds are reported using an accounting method called *modified accrual accounting*, which focuses on current financial resources. Such information may be useful in evaluating the government's short-term financing requirements. These statements provide a detailed short-term view of the Government's finances that assists in determining whether there will be adequate financial resources available to meet the Government's current needs. The relationship between government activities in the government-wide financial statements and the governmental funds financial statements is described in a reconciliation that is a part of the fund financial statements.

The Government has five governmental fund types: the General Fund, Special Revenue Funds, Debt Service Funds, the Capital Projects Funds, and the Permanent Fund. Only five individual funds are being considered major funds – the General Fund, Fire Protection, Special Purposes Local Option Sales Tax Fund (SPLOST) Phase III, Special Purposes Local Option Sales Tax Fund (SPLOST) Phase IV and Special Purposes Local Option Sales Tax Fund (SPLOST) Phase V.

Proprietary Funds

The Government has two types of proprietary funds used to account for activities that operate similar to commercial enterprises found in the private sector. Funds that charge fees for services provided to outside customers including other local governments are known as Enterprise Funds. These funds are used to report the same functions presented as business-type activities in the government-wide financial statements. Funds that charge fees for services provided to departments within the reporting government are known as Internal Service Funds. Proprietary funds use the accrual basis of accounting, thus there is no reconciliation needed between the government-wide financial statements for business-type activities and the proprietary fund financial statements, except for the allocation of internal service fund activity.

The Government has seven enterprise funds: Water and Sewer, Augusta Regional Airport, Waste Management, Municipal Golf Course, Transit, Daniel Field Airport, and Garbage Collection. The Government has seven internal service funds: Risk Management, Fleet Operations, Workers Compensation, Employee Health Benefits, Unemployment, Long-Term Disability Insurance and GMA Leases. The Water and Sewerage Fund and Augusta Regional Airport are the only funds being considered major funds for presentation purposes.

Fiduciary Funds

The Fiduciary Funds are used to account for assets held by the Government as an agent for individuals, private organizations, other governments and other departments. The Government is responsible for ensuring that the assets reported in these funds are used only for their intended purposes and only by those to whom the assets belong. These funds are not reflected in the government-wide financial statements because the resources are not available to support the Government's operations or programs.

Government-wide Financial Analysis

Comparative data for the entity-wide governmental activities and the business-type activities is provided below.

Net Assets

Net assets may serve over time as one useful indicator of a government's financial condition. The assets of the Government exceeded liabilities by \$871.9 million as of December 31, 2010.

The largest portion of the Government's net assets, \$587.5 million or 67.4%, reflects its investment in capital assets such as land, buildings, equipment and infrastructure (road, bridges, sidewalks, water lines and sewer lines) less any related debt used to acquire those assets that is still outstanding. The Government uses these capital assets to provide services to its citizens; therefore, these assets are not available for future spending. Although the Government's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the Government's net assets, \$155.3 million or 17.9%, represents resources that are subject to external restrictions on how they may be used. The remaining balance of unrestricted net assets, \$129.1 million or 14.7%, may be used to meet the Government's ongoing obligations to citizens and creditors.

Several particular aspects of the Government's financial operations positively influenced the total *unrestricted governmental net assets*:

- Continued diligence in the maintenance of 75 -90 days unreserved fund balance in the General Fund.
- Continued diligence in the collection of property taxes by maintaining a collection percentage of 99% for real and personal property.
- Continued low cost of debt due to the County's high bond rating.

Changes in Net Assets

Governmental activities. Governmental activities increased the Government's net assets by \$21.7 million, and thereby accounting for 66.5% of the total growth in the net assets of the Government. Key elements of this increase are as follows:

Governmental Revenues. Property tax (40%) and other taxes (60%) continue as the main source of revenue of the Government amounting to 75.9% in 2010, compared to 75% in 2009. Sales tax revenues contributed approximately \$72.6 million to the increase in net assets.

Governmental Functional Expenses: As reflected in the summary of changes in Net Assets, the Government expended 51.6% of the appropriations for judicial and public safety expenditures. The Government continues to commit substantial financial resources for the safety of its citizens. Other expenditures accounted for the remaining 48.4%.

Business-type activities: Business-type activities increased the Government's net assets by approximately \$10.9 million accounting for 33.5% of the total growth in the government's net assets. Key elements of this increase are as follows:

- The Waste Management Fund reported an increase in net assets of \$3.2 million. This increase was due to maintaining volumes similar to 2009 volumes. The increase in volumes was stemmed from a volume based discount issued in 2004. The increase was also due to an increased investment in capital assets specifically an upgrade to the Compressed Natural Gas collection system.
- The Water and Sewer Fund reported an increase in net assets of \$3.3 million. This increase was largely due to an increase in user charges due to rate increases approved upon issuance of the most recent Water & Sewer Revenue Bonds in 2004.
- The Augusta Regional Airport Fund reported a decrease in net assets of \$70 thousand. This decrease was due to operating expenses slightly exceeding operating and non-operating revenues.
- Garbage Collection net assets increase of \$423 thousand.

Financial Analysis of the Government's Individual Funds

Augusta, Georgia uses fund accounting to demonstrate compliance with finance-related legal requirements.

Governmental Funds

The focus of the Government's governmental funds is to provide information on near-term inflows, outflows and balances of usable resources. Such information is useful in assessing the Government's financial requirements. In particular, the unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year. The combined fund balance of all the governmental funds is \$281.6 million, of which \$124 million, or 44%, is unreserved and undesignated.

General Fund

The General Fund is the primary operating fund of the Government. At the end of the current fiscal year, total fund balance of the General Fund was \$32.8 million, of which \$28.4 million, or 87%, was unreserved. A portion of the unreserved fund balance in the General Fund is designated for risk benefit, in the amount of \$4.7 million. As a measure of the General Fund's liquidity, it may be useful to compare both undesignated and designated fund balance to total fund expenditures. As of December 31, 2010, total unreserved fund balance, both undesignated and designated, represents 24% of total general fund expenditures.

The fund balance of the General Fund increased \$1.6 million (5.1%). Key factors to this result include cost reduction measures that were implemented and observed throughout the year. This increase in fund balance represents 1.29% of the 2010 budget. Also a reduced transfer of funds to the transit department due to the receipt and recognition as revenue of grant reimbursements was a contributing factor.

General Fund Budgetary Highlights

During the year, the Government revised the budget on several occasions. Generally, budget amendments fall into one of five categories: 1) amendments to appropriate fund balance for encumbrances from the prior year; 2) amendments made to adjust the estimates that are used to prepare the original budget resolution once exact information is available; 3) amendments made to recognize new funding amounts from external sources, such as Federal and State grants; 4) increases in appropriations that become necessary to maintain services; and 5) amendments to transfer appropriations between departments. The fifth category has no effect on the final budget and, therefore, is not addressed in this narrative.

The actual operating revenues for the General Fund were less than the budgeted amount by \$3.3 million, or 2.7%. The individual sources within the revenues fluctuated both positively and negatively. No individual source materially varied from the final budget.

The 2010 adopted budget (November 17, 2009) projected Ad Valorem tax revenues remain at 2009 levels with no projected growth in the tax digest and a decrease of 1% in sales tax revenues. As the economy continued to struggle, the Augusta Commission was unwilling to compound the effects on its citizens by considering a tax increase and approved significant expenditure reduction and use of \$1.8 million in fund balance to fund a budgeted deficit. In July 2010 the Augusta Commission voted to reduce the 2010 mill rate by .093 mills to the roll back rate levels.

Capital Projects Funds

The Government uses Capital Projects Funds to account for the acquisition and construction of major capital facilities that are not financed by Proprietary Funds. Major funds included in the fund financial statements are the SPLOST Fund Phase III, SPLOST Fund Phase IV and SPLOST Fund Phase V. The proceeds of the special purpose 1% sales tax are accounted for in Capital Projects Funds until improvement projects are completed. The SPLOST Fund Phase IV's fund balance is \$53.2 million and the SPLOST Fund Phase V's fund balance is \$65.3 million, all of which is held for specific construction and improvement projects and capital acquisitions.

Proprietary Funds

The activities of the Government that render services to the general public on a user charge basis, or that require periodic determination of revenues for public policy are accounted for as Enterprise Funds. The Government's proprietary funds provide the same type of information found in the government-wide statements but in more detail. Unrestricted net assets at the end of the year were as follows: Water and Sewer System Fund, \$61.2 million; Augusta Regional Airport, \$8.2 million; Nonmajor Enterprise funds, \$6.9 million. The total growth (reduction) in net assets for previously mentioned funds were \$3.2 million, (\$70) thousand and \$7.8 million, respectively. Other factors concerning the finances of these funds have already been addressed in the discussion of the Government's business-type activities.

Capital Assets and Debt Administration

Capital Assets

The Government's investment in capital assets for its governmental and business-type activities as of December 31, 2010 amounts to \$1.1 billion (net of accumulated depreciation). This investment in capital assets includes land, buildings, improvements, equipment, infrastructure and construction in progress. Infrastructure assets are items that are normally immovable and of value only to the Government, such as roads, bridges, streets and sidewalks, drainage systems and other similar items.

Major capital asset transactions during the year included construction of infrastructure, buildings, acquisition of public safety vehicles, construction of water and sewerage systems, and construction of a new airport terminal and building.

Additional information on the Government's capital assets can be found in Note 3 of the notes to the financial statements of this report.

Long-Term Debt

As of December 31, 2010, the Government had a total of \$648.9 million in outstanding long-term debt. Of this amount, \$476.5 million consists of revenue bonds backed by the revenues of the water and sewer system.

The Government bond rating was upgrade from A1 by Moody's Investor Service to Aa2 in June 2010, this bond rating was also confirmed by Fitch Rating Service. The bond ratings are clear indications of the sound financial condition of the Government. The high ratings are a primary factor in keeping interest costs low on the Government's outstanding debt.

The State of Georgia limits the amount of general obligation debt that a unit of government can issue to 10 percent of the total assessed value of taxable property located within that government's boundaries. The legal debt margin for the Government is \$452 million based on the 2010 County-wide bond digest of \$4.52 billion

Additional information regarding the Government's long-term debt can be found in Note 3 of the notes to the financial statements of this report.

Economic Factors and Next Year's Budget and Rates

The following key economic indicators reflect the continued stability of the Government.

- There is a budgeted use of existing fund balance in the 2010 adopted budget, and a decrease of the county wide millage rate.
- The downtown area has within a one mile radius the following capital projects under construction
 - The Government backed project
 - Trade, Event and Exhibit Center - \$38 Million
 - Reynolds Street Parking Deck - \$10 Million
 - Library - \$24 Million
 - Judicial Center - \$67 Million
 - Private / Other Development
 - KROC Center - \$98 Million
 - GHSU School of Dentistry – \$112 Million
- The Government has received the following national rankings
 - Where to Retire Magazine: 8 Enticing Money-Saver Towns
 - RelocateAmerica: Top 10 Places to Live for 2011 (ranked 7th)
 - The Brookings Institute: One of the nation's most resilient cities for the eighth straight time.
 - RelocateAmerica: Top Places to Live
 - Business Insider : The 20 Cities That Are Having An Awesome Recovery (ranked #6)
- The Government has an unemployment rate of 10.3 %, slightly higher than the state average of 10.2%.
- The 2010 tax digest increased by 1.14%, with .01% of this from normal factors such as increased exemptions and the remaining 1.13% from reassessments.
- In 2010 the monthly Local Option Sales Tax collections increased at a rate of 1.52% over 2009, as compared to other similar governments whose sales tax collection changed at rates of -.065% to 5.93%.

Budget Highlights for the Fiscal Year Ending December 31, 2010

Each year, the County's overall goal is to provide essential services to our citizens as cost effectively and professionally as possible. The Augusta Commission works diligently to plan for the future while insuring current programs and services are working as smoothly as possible. We continually seek to improve. We are pleased that through our fiscal responsibility we are able to maintain our current level of service without an increase in taxes.

Governmental Activities: The Ad Valorem Taxes are projected to remain steady at the 2009 level. The 2010 tax digest has shown an increase of approximately 1.14%. Other taxes are expected to remain steady or slightly decrease with an expected 1% decrease in sales tax revenues. The FY 2010 budget for the general fund is expected to be slightly above the 2009 level due to funding for the operating deficit of the transit department, and the continued rise in the cost of fuel and operating supplies. Several new public facilities began operations in 2010 increasing building operational costs. The general economic climate for the city government of 2010 is expected to be stable. The undesignated fund balance should decrease slightly by \$1.8 million due to budgeted use of fund balance to balance the General fund instead of increasing the county's millage rate.

Business – type Activities: Overall Water and Sewer revenue is projected to increase by more than 3% due to the increased rates.

**Reconciliation of the Statement of Revenues, Expenditures and
Changes in Fund Balances of Governmental Funds to the
Statement of Activities
Year Ended December 31, 2010**

Amounts reported for governmental activities in the statement of activities are different because:

Net change in fund balances - total governmental funds	\$ 1,355,461
<p>Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay exceeded depreciation in the current period.</p>	
Capital outlay	81,080,521
Depreciation expense	<u>(11,843,994)</u>
	69,236,527
<p>Governmental funds recognize revenues when current resources are provided; the Statement of Activities recognizes revenue when earned, resulting in a timing difference of current period revenues relating to converting from modified-accrual basis to full accrual basis.</p>	
	(788,272)
<p>The change in the net pension obligation or asset does not affect current financial resources and are not reported as a revenue or expense in the funds.</p>	
	539,176
<p>The change in the net other post employment benefit obligation or asset does not affect current financial resources and are not reported as a revenue or expense in the funds.</p>	
	(11,035,931)
<p>The issuance of long-term debt (e.g. bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however has any effect on net assets. Also, governmental funds report the effect of issuance costs, premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related accounts.</p>	
General obligation bonds payable	(15,973,383)
Revenue bonds payable	(22,120,000)
Compensated absences	73,354

Notes to Financial Statements

Year Ended December 31, 2010

Note 1 - Summary of significant accounting policies

Augusta, Georgia (“the Government”) accounts for its financial position and results of operations in accordance with accounting principles generally accepted in the United States of America (GAAP) applicable to governmental units. The Government’s reporting entity applies all relevant Government Accounting Standards Board (GASB) pronouncements. In the government-wide financial statements and in the proprietary fund financial statements, the Government applies Financial Accounting Standards Board (FASB) pronouncements and Accounting Principles Board (APB) opinions issued on or before November 30, 1989, unless those pronouncements conflict with or contradict GASB pronouncements, in which case, GASB prevails. Accordingly, the Government has adopted accounting policies, as described below.

A. Reporting entity

Augusta is located in the east central section of the state on the south bank of the Savannah River, which serves as the boundary between Georgia and South Carolina. Augusta is on the fall line and has a landscape dotted with foothills which descend to the coastal plain. Augusta is the head of the navigation on the Savannah River and is 135 miles east of Atlanta, 127 miles northwest of the port of Savannah, and 72 miles southwest of Columbia, South Carolina. Augusta is the trade center for 13 counties in Georgia and five in South Carolina, a section known as the Central Savannah River Area.

The Government was created by legislative act in the State of Georgia in 1995 from the unification of the two governments, the City of Augusta, Georgia and Richmond County, Georgia. On June 20, 1995, the citizens of Richmond County and the City of Augusta voted to consolidate into one government named Augusta, Georgia. The officials for the new government were elected and, based on the charter, took office on January 1, 1996. The unified government combined all functions and began financial operations January 1, 1996.

The Government is governed by a full-time Mayor, with a term of four years, and a ten member Commission, who serve on a part-time basis and are elected to staggered terms of four years. The Mayor and Commission appoint an Administrator who serves as a full-time administrative officer and is responsible for the daily operations of the Government.

The Government’s financial statements include the accounts of all Augusta and Richmond County operations. The criteria for including organizations as component units within Augusta’s reporting entity, as set forth in Section 2100 of GASB’s *Codification of Governmental Accounting and Financial Reporting Standards*, include whether:

- the organization is legally separate (can sue and be sued in their own name)
- the Government holds the corporate powers of the organization
- the Government appoints a voting majority of the organization’s board
- the Government is able to impose its will on the organization
- the organization has the potential to impose a financial benefit/burden on the Government
- there is fiscal dependency by the organization on the Government

Utilizing the above criteria, the following agencies and commissions were included using the blending method in the financial statements: Augusta Port Authority, due to degree of fiscal dependency on the Government, and Richmond County Public Facilities, Inc. (see Note 4D).

Complete financial statements for the individual component units may be obtained at the following address: Augusta, Georgia, Finance Department, 530 Greene Street, Augusta, Georgia 30901.

The Government’s other component units; the Department of Health, Urban Redevelopment Authority, Augusta-Richmond County Coliseum Authority, Augusta Canal Authority and Downtown Development Authority are included in separate columns in the accompanying government-wide financial statements. These units are reported in separate columns to emphasize that they are legally separate from the Government. Separate financial statements may be obtained from the Richmond County Department of Health at 950 Laney Walker Blvd., Augusta, Georgia 30901. Separate financial statements for the Augusta-Richmond County Coliseum Authority may be obtained from the Civic Center, 601 Seventh St., Augusta, Georgia 30901. Separate financial statements for the Downtown Development

Notes to Financial Statements - Continued

Year Ended December 31, 2010

Note 1 - Summary of significant accounting policies (Continued)

Authority may be obtained from the Downtown Development Authority at 936 Broad Street, Suite 107, Augusta, Georgia, 30901. Separate financial statements for the Augusta Canal Authority may be obtained from the Augusta Canal Authority at 1450 Greene Street, Suite 400, Augusta, Georgia, 30903.

Information for the Department of Health and Augusta-Richmond County Coliseum Authority is presented for the year ended June 30, 2010, which were the latest financial statements available. The Department of Health and Augusta-Richmond County Coliseum Authority operate with the June 30 fiscal year end, which is different from the governments fiscal year end.

Urban Redevelopment Authority – A voting majority of the board is appointed by the Government, and fiscal dependency.

Augusta Canal Authority – A voting majority of the board is appointed by the Government, and fiscal dependency.

Richmond County Department of Health - A voting majority of the board is appointed by the Government.

Downtown Development Authority – A voting majority of the board is appointed by the Government.

Augusta-Richmond County Coliseum Authority – A voting majority of the board is appointed by the Government, and fiscal dependency.

B. Basis of presentation

Government-wide statements: The statement of net assets and the statement of activities display information about the primary government. These statements include the financial activities of the overall government. Eliminations have been made to minimize the double counting of internal activities. These statements distinguish between the *governmental* and *business-type* activities of the Government. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange transactions. Business-type activities are financed in whole or in part by fees charged to external parties. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities presents a comparison between direct expenses and program revenues for the different business-type activities of the Government and for each function of the Government's governmental activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. Program revenues include (a) fees and charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

Fund financial statements: The fund financial statements provide information about the Government's funds. Separate statements for each fund category – governmental, proprietary and fiduciary – are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds.

Proprietary fund operation revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from non-exchange transactions or ancillary activities.

The Government reports the following major governmental funds:

General Fund – The General Fund is the general operating fund of the Government. The General Fund accounts for all financial resources except those that are required to be accounted for in another fund. The primary revenue sources are ad valorem taxes, state grants, and various other taxes and licenses. The primary expenditures are for public safety, recreation, street maintenance and improvements, and sanitation services.

Note 1 - Summary of significant accounting policies (Continued)

C. Measurement focus and basis of accounting

Government-wide, Proprietary and Fiduciary Fund Financial Statements – The government-wide, proprietary fund and fiduciary financial statements are reported using the economic resources measurement focus, except for agency funds which have no measurement focus. The government-wide, proprietary fund and fiduciary financial statements are reported using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Nonexchange transactions, in which the Government gives (or receives) value without directly receiving (or giving) equal value in exchange, include property taxes, grants, and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes are levied. Revenue from grants and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the Government enterprise funds are charges to customers for sales and services. The Government also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Governmental Fund Financial Statements – Governmental funds are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current period. The Government considers all revenues available if they are collected within 60 days after year-end. Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, claims and judgments, and compensated absences, which are recognized as expenditures to the extent they have matured. General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Those revenues susceptible to accrual are property taxes, licenses, interest revenues and charges for services. State-shared revenues collected and held by the state at year-end on behalf of the Government also are recognized as revenue. Fines, fees and permits are not susceptible to accrual because generally they are not measurable until received in cash.

Grant revenues which are unearned at year-end are recorded as unearned revenues. Under the terms of grant agreements, the Government funds certain programs by a combination of specific cost-reimbursement grants, categorical block grants, and general revenues. Thus, when program expenses are incurred, there are both restricted and unrestricted net assets available to finance the program. It is the Government's policy to first apply cost-reimbursement grant resources to such programs, followed by categorical block grants, and then by general revenues.

D. Budgets and budgetary accounting

The Government generally follows these procedures in establishing the budgetary data reflected in the financial statements:

1. Budgetary hearings are held in August to discuss departmental budgets.
2. The Administrator presents the tentative budget to the Commission in October.
3. The permanent budget is legally adopted by the Commission prior to the start of the next fiscal year.

AUGUSTA, GEORGIA

Notes to Financial Statements - Continued

Year Ended December 31, 2010

Note 1 - Summary of significant accounting policies (Continued)

4. All budget revisions or changes must be approved as required by Georgia law and administrative policy. Transfer of budgeted amounts within operating categories within departments can be requested by department directors. Transfer of budget amounts involving capital outlay or salaries require approval of the Augusta-Richmond County Commission. The Augusta-Richmond County Commission must approve revisions that alter the total expenditures of any department or fund. Budgets for capital items may be reappropriated in the ensuing year's budget. Departments may request for other budget items to be reappropriated in the form of a budget adjustment, contingent of the Commission's approval.
5. Formal budgetary integration is employed as a management control device during the year for the General, Special Revenue, Debt Service and Capital Projects Funds.
6. Budgets for these funds are adopted on a basis consistent with accounting principles generally accepted in the United States of America (GAAP).

Budget information for expenditures represents the operating budget (as amended) as approved by the Augusta-Richmond County Commission.

E. Encumbrances

Encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation, is employed as an extension of formal budgetary integration for the General Fund, Special Revenue Funds, Debt Service and Capital Projects Funds. Encumbrances are recorded when purchase orders are issued but are not considered expenditures until liabilities for payments are incurred. Encumbrances for outstanding purchase orders do not lapse at year end. Therefore, they are reported as reservations of fund balance.

F. Cash and cash equivalents

The Government maintains a cash and investment pool in which the General Fund and all funds share. Each fund's portion of the pool is displayed on its respective balance sheet as cash and cash equivalents and includes non-pooled cash and investments separately held. Funds which have an excess of outstanding checks over bank balance have had these balances reclassified as a due to the General Fund for purposes of financial statement presentation. Interest income is allocated to each fund monthly based on its average monthly balance.

For the purposes of financial statement presentation, the Government considers all highly liquid investments with an original maturity of three months or less, or with insignificant early withdrawal penalties, to be cash equivalents. Exceptions include the Government's pension plans which classify only cash as cash equivalents in order to appropriately report investment activity. Cash equivalents include amounts in certificates of deposit, repurchase agreements, and U.S. Treasury bills, and are stated at cost which approximates market. All deposits are stated at cost plus accrued interest, which reasonably estimates fair value.

The State statutes authorize the Government to invest in obligations of the United States government and agencies thereof, general obligations of the State of Georgia or any of its political subdivisions, or banks and savings and loan associations to the extent that they are secured by the Federal Deposit Insurance Corporation.

G. Investments

Investments are reported at fair value. Fair value is determined as follows: short-term investments are reported at cost, which approximates fair value; securities traded on national exchanges are valued at current prices or current prices of similar securities; securities for which an established market does not exist are reported at estimated fair value using selling prices for similar investments for which there is an active market; fair value of real estate is based on appraised values.

H. Inventories and prepaid expenses

Inventories in the governmental funds are valued at cost using the first-in, first-out method. Inventories in the proprietary funds are valued at the lower of cost (first-in, first-out) or market. The costs of governmental fund-type inventories and prepaid expenses are recorded as expenditures when consumed rather than when purchased. Reported inventories and prepaid expenses are equally offset by a fund balance reserve which indicates that they do not constitute "available spendable resources".

Note 1 - Summary of significant accounting policies (Continued)

I. Interfund receivables/payable and Internal Balances

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as “due from other funds” or “due to other funds” on the balance sheet of the fund financial statements and as “internal balances” on the statement of net assets in the government-wide financial statements.

J. Bond discounts and issuance costs

Bond discounts and issuance costs for proprietary funds are deferred and amortized over the term of the bonds using the effective-interest method. Bond discounts are presented as a reduction of the face amount of bonds payable, whereas issuance costs are recorded as deferred charges.

K. Restricted asset

Certain assets of the Debt Service Fund and Enterprise Funds are classified as restricted assets on the balance sheet because their use is limited by applicable debt covenants.

L. Capital assets

Capital assets are defined by the government as assets with an initial, individual cost of more than a certain cost and an estimated useful life in excess of one year. Minimum capitalization costs are \$5,000 for all categories of capital assets. Purchased or constructed capital assets are reported at cost or estimated historical cost. Donated capital assets are recorded at their estimated fair value at the date of donation. General infrastructure assets acquired prior to January 1, 2001, consist of the streets network that were acquired or that received substantial improvements subsequent to January 1, 1980. The streets network is reported at estimated historical cost using deflated replacement cost. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Depreciation is computed using the straight-line method. A summary of the estimated useful lives is as follows:

Vehicles	5 years
Furniture and fixtures	7 years
Machinery and equipment	10 years
Buildings and improvements	30 years
Water and Sewer systems	30 - 70 years
Infrastructure	30 years

M. Compensated absences

The vacation policy of the Government provides for the accumulation of up to thirty days earned vacation leave with such leave being fully vested when earned. For the Government's government-wide financial statements and proprietary fund financial statements, an expense and a liability for compensated absences and the salary-related payments are recorded as leave is earned. The Government has assumed a first-in, first-out method of using accumulated compensated time. The portion of that time that is estimated to be used in the next fiscal year has been designated as a current liability in the government-wide financial statements.

No accrual has been established for accumulated sick leave of employees since it is the Government's policy to record the cost of sick leave only when it is used.

N. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amount of revenues and expenditures/expenses during the reporting period. Actual results could differ from those estimates.

O. Reclassification

Certain 2009 amounts have been reclassified to conform to the 2010 financial statement presentation.

Note 3 – Detailed notes on all funds

A. Deposits and investments

Primary government

Deposits:

Custodial Credit Risk for deposits is the risk that, in the event of bank failure, a government's deposits may not be returned to it. At December 31, 2010 approximately \$278,400,000 of the Government's approximate \$288,500,000 bank balance was uninsured. Of these uninsured deposits, none were collateralized with securities held by the financial institution's trust department or agent in the Government's name, approximately \$240,100,000 were collateralized with securities held by the financial institution, by its trust department or agency, but not in the Government's name, and approximately \$38,300,000 were uncollateralized.

Investments:

Primary Government (Other than Pension Trust Funds)

The investment policy of the Government is consistent with the State of Georgia's policy, which is to maximize the protection of State funds on deposit while accruing an advantageous yield on those funds in excess of those required for current operating expenses (Official Code of Georgia Annotated [OCGA] 50-17-51).

The local government investment pool “Georgia Fund 1”, created by O.C.G.A. §36-83-8, is a stable net asset value investment pool. Georgia Fund 1 operates in a manner consistent with Rule 2a-7 of the Investment Company Act of 1940 and is considered to be a 2a-7 like pool. The pool is not registered with the SEC as an investment company; the regulatory oversight of the pool is assigned to the State of Georgia’s Office of Treasury and Fiscal Services.

The pool’s primary objectives are safety of capital, investment income, liquidity and diversification while maintaining principal (\$1.00 per share value). Net asset value is calculated weekly to ensure stability. The pool distributes earnings (net of management fees) on a monthly basis and determines participant’s shares sold and redeemed based on \$1.00 per share. As a public fund, Georgia Fund 1 is exempt from any disclosure of custodial credit risk.

The Georgia Extended Asset Pool (GEAP) is offered by the State of Georgia to counties, municipalities, public colleges and universities, board of education, special districts, state agencies, and other authorized entities as an alternative to Georgia Fund I. A primary objective of GEAP is the prudent management of public funds on behalf of state and local governments. GEAP was designed for those investors seeking taxable income higher than money market rates and willing to accept price fluctuations.

Deposit and investment transactions are subject to a variety of risks. The Government’s adopted investment policies seek to promote the safety of principal, provide adequate liquidity for operation needs, earn market rates of return on investments consistent with liquidity needs and investment quality, and conform with legal requirements.

Interest rate risk is the risk that changes in interest rates will adversely affect the value of an investment. The Government’s investment policy states that the Government will structure its portfolio to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities prior to their maturity. The policy also emphasizes the purchase of shorter term or more liquid investment. The policy does not place formal limits on investment maturities. The Georgia Fund 1 has an interest rate risk of 24 day weighted average maturity.

Credit risk is the risk that an issuer or counterparty to an investment will not fulfill its obligations. The Government’s investment policy seeks to minimize credit risk through diversification of investments within the choices allowed under state statutes. Investments in all corporate securities are limited to investment grade or higher as rated by a nationally recognized rating agency.

All of the Government’s investments in U.S. Government securities carry the explicit guarantee of the U.S. government. U.S. Agency securities underlie the repurchase agreements.

Concentration of credit risk is the risk of loss attributed to the magnitude of an investment in a single issuer. Disclosures are required for any issuer that represents 5% or more of total investments, exclusive of mutual funds, external investment pools and investments issued or guaranteed by the U.S. government. No single issuer represented more than 5% of the total portfolio. The Government does not have a formally adopted policy for managing concentration of credit risk.

There are no limits on fixed income securities issued directly by the U.S. government or any agency thereof.

Adjustments to full accrual relate to internal service funds. Internal service funds predominately serve the governmental funds. Accordingly, the internal service funds receivables balances are included in governmental activities on the accompanying government-wide financial statement.

For the above-mentioned long-term notes receivable, the bank maintains records that are not recorded in the governmental fund financial statements. These loans represent funds received through HUD's Housing Rehabilitation Program. The Housing Rehabilitation Program is designed to fund improvements to homes owned and occupied by persons in low to moderate-income ranges. In 1993, loans were also made to owners of rental units under a deferred loan arrangement as part of the Housing Rehabilitation Program. Loans made for these projects vary as to amounts and interest rates based on the level of income of the owner/occupiers. In the governmental fund financial statements, repayments of these loans are recorded as other revenue in the Housing and Neighborhood Development Fund, a nonmajor special revenue fund.

Note 3 – Detailed notes on all funds (continued)

Finally, the Fiduciary fund financial statements include \$21,274,839 in taxes receivable recorded in agency funds. This amount is excluded from the foregoing schedule and represents the amount of receivables billed on behalf of other governments in an agency relationship. Also, included in the Fiduciary fund financial statements and excluded from the foregoing schedule are interest receivable totaling \$233,251 and accounts receivable totaling \$1,608,547 the pension trust fund.

In a prior year, the former City of Augusta entered into an agreement with the Georgia Housing and Finance Authority (GHFA) to aid in the administration of Federal funds granted through the State for HUD's Rental Rehabilitation Program. The Government acts only in an administrative capacity and does not directly receive or disburse any funds related to this project. Therefore, the receipts, disbursements and related notes receivable for the GRFA program have not been included in the financial statements.

The Downtown Development Authority (the "Authority") owns additional properties which were contributed in prior years. The Authority did not obtain valuations of the properties at the date of contribution and records are not available to reflect the correct fair market value of the properties on the date contributed. Therefore, the Authority's financial statements do not reflect the value of these properties. If the property values were attainable, the net assets of the Authority would increase by the respective property values. The assets that are excluded from the financial statements are as follows:

Note 3 - Detailed notes on all funds (Continued)

Adjustments to full-accrual basis include \$637,566 related to accrued interest on governmental long-term debt, \$19,569,950 to other liabilities related to unfunded health insurance contribution for retirees, \$21,939 to other liabilities related to unfunded annual pension cost, \$(854,570) relating to the reclassification of accrued vacation from accrued liabilities to liabilities due within one year, and account payable, other accrued liabilities and accrued salaries and vacation of \$778,298, \$13,852 and \$9,667, respectively, related to internal service funds. Internal service funds predominately serve the governmental funds. Accordingly, the accounts payable and accrued liability balances for the internal service funds are included in the governmental activities on the accompanying government-wide financial statement.

E. Deferred/Unearned Revenues

The balance of deferred revenues in the fund financial statements (includes both the deferred and unearned amounts disclosed below) and unearned revenues in the government-wide financial statements at year-end is composed of the following elements:

	Deferred Revenue	Unearned Revenue
Taxes receivable net of allowance – General Fund	\$ 1,748,091	\$ -
Taxes receivable net of allowance – Fire Protection Fund	257,152	-
Taxes receivable net of allowance – Nonmajor governmental funds	819,783	-

F. Landfill closure and postclosure costs

State and Federal laws and regulations require the Government to place a final cover on its landfill when closed and perform certain maintenance and monitoring functions at the landfill site for thirty years after closure. In addition to operating expenses related to current activities of the landfill, an expense provision and related liability are being recognized based on the future closure and postclosure care costs that will be incurred near or after the date the landfill no longer accepts waste. The recognition of these landfill closure and postclosure care costs is based on the amount of the landfill used during the year. The estimated liability for landfill closure and postclosure care costs has a balance of \$16,245,410 as of December 31, 2010, which is based on 93.60% usage (filled) of Cell II C and 5.03% usage (filled) of Cell III, which are operating currently, and 100% usage (filled) of Cells II A and II B. This liability is recorded in the Waste Management Enterprise Fund. It is estimated that an additional \$11,523,413 be recognized as closure and postclosure care expenses between the date of the statement of net assets and the date the landfills are expected to be filled to capacity, which is in 2015 and 2165, respectively. The estimated total current cost of the landfill closure and postclosure care, \$27,768,823, is based on the amount that would be paid if all equipment, facilities, and services required to close, monitor, and maintain the landfill were acquired as of December 31, 2010. However, the actual cost of closure and postclosure care may be higher due to inflation, changes in technology, or changes in landfill laws and regulations.

The Government expects to finance the costs for the estimated landfill closure and postclosure care costs as they become due during the coming thirty years through the regular operations of the Government.

For financial reporting purposes, the debt is considered defeased and, therefore, not included as a liability in the government-wide financial statements Funds. As of December 31, 2010 the amount of defeased debt outstanding but removed from the governmental debt is \$475,000.

In 2007, the Housing and Neighborhood Development Section 108 loan was defeased by the creation of an irrevocable trust fund. Funds received from repayment of a loan to a local hotel were used to purchase U.S. Government securities that were placed in a trust fund. The investments and fixed earnings from the investment are sufficient to fully service the defeased debt until the debt matures. For financial reporting purposes, the debt is considered defeased and, therefore, not included as a liability in the government-wide financial statements Funds. As of December 31, 2010, the amount of defeased debt outstanding but removed from the governmental debt is \$2,500,000.

Certificates of Participation

In June 1998, the Government entered into a lease pool agreement with the Georgia Municipal Association (the "Association"). The funding of the lease pool was provided by the issuance of \$150,126,000 Certificates of Participation by the Association. The Association passed the net proceeds of \$15,765,117 through to the participating municipalities with the Government's participation totaling \$16,888,000, net of original issue discount of \$1,122,883. The lease pool agreement with the Association provides that the Government owns their portion of the assets invested by the pool and is responsible for the payment of their portion of the principal and interest of the Certificates of Participation. The principal of \$16,888,000 is due in a lump sum payment on June 1, 2028. Interest is payable at a rate of 4.75% each year. The Government draws from the investment to lease equipment from the Association. The lease pool agreement requires the Government to make lease payments back into its investment account to fund the principal and interest requirements of the 1998 GMA Certificates of Participation. Equipment in the amount of \$1,896,551 was leased during 2010.

Series 2007 Water and Sewerage Revenue Bonds

During 2007, the Government issued \$177,010,000 in Series 2007 Water and Sewerage Revenue Bonds. A portion of the proceeds from the sale of these bonds was used to refund all of the former Series 1996 and 1997 Water and Sewerage Revenue Bonds in the amount of \$56,875,000. The remaining portion of the bond proceeds of \$120,135,000 was used to advance refund a portion of the Series 2000 and 2002 Water and Sewerage Revenue Bonds. The current refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of approximately \$4,300,000. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2030 using the effective-interest method. The refunding decreased the total debt service payments over the next 21 years by approximately \$5,600,000 and produced an economic gain of approximately \$3,700,000. The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of approximately \$3,200,000. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2030 using the effective-interest method. The refunding decreased the total debt service payments over the next 23 years by approximately \$7,200,000 and produced an economic gain of approximately \$4,600,000. Proceeds of approximately \$126,793,000 from the defeased issues were used to purchase U.S. Government Securities. Those securities were deposited in an irrevocable trust fund with an escrow agency to provide for all future debt service payments on the above mentioned bonds. As of December 31, 2010, the amount of these defeased debts outstanding but removed from the Water and Sewer Fund is \$37,010,000.

Series 2004 Water and Sewerage Bonds

During 2004, the Government issued \$160,000,000 in Series 2004 Water and Sewerage Revenue Bonds for the purpose of financing the costs of making additions, extensions and improvement to the Utilities' water and sewer system.

Series 2004 Solid Waste Management Authority of Augusta Revenue Bonds

During 2004, the Government issued \$11,475,000 in Series 2004 Solid Waste Management Authority of Augusta Revenue Bonds for the purpose of paying all or a portion of the costs of improving and equipping the Government's municipal solid waste landfill.

Series 2002 Water and Sewerage Revenue Bonds

During 2002, the Government issued \$149,400,000 in Series 2002 Water and Sewerage Revenue Bonds. A portion of the proceeds from the sale of these bonds was used to pay the outstanding balance of the Georgia Environmental Facilities Authority revolving loan in the amount of \$8,815,000 with an interest rate of 5.5%. The remaining portion of the bond proceeds of \$140,585,000 was issued for the purpose of financing the costs of making additions, extensions and improvements to the Utilities' water and sewer system. A portion of the net proceeds of \$8,692,368 (after payment of \$153,574 of underwriting fees and other issuance costs) was used to repay the Georgia Environmental Facilities Authority revolving loan.

Note 3 - Detailed notes on all funds (Continued)

The remaining portion of the proceeds of \$125,691,320 (after payment of \$2,748,066 of underwriting fees and other issuance costs) plus an additional \$11,753,672 of funds from a capitalized interest fund is to be used for improvements to the Utilities' water and sewer system. No difference resulted in the current refunding between the reacquisition price and the net carrying amount of the old debt. The Government completed the refunding to obtain an economic gain (difference between present values of the old and new debt service payments) of approximately \$792,000.

Series 2000 Water and Sewerage Revenue Bonds

During 2000, the Government issued \$97,080,000 in Series 2000 Water and Sewerage Revenue Bonds for the purpose of financing the costs of making additions, extensions and improvements to the Utilities' water and sewer system.

Series 1996 Water and Sewerage Revenue Bonds

During 1996, the Government issued \$66,600,000 in Series 1996 Water and Sewerage Revenue Bonds. A portion of the proceeds from the sale of these bonds was used to advance refund all of the former City of Augusta's Series 1972 and 1991 Water and Sewerage Revenue Bonds and the former Richmond County's Series 1987 and 1991 Water and Sewer Revenue Bonds. Proceeds of \$19,400,000 plus an additional \$4,900,000 of sinking fund monies from the defeased issues were used to purchase U.S. government securities. Those securities were deposited in an irrevocable trust fund with an escrow agent to provide for all future debt service payments on the above-mentioned bonds. As a result, the bonds are considered to be defeased and the liabilities for those bonds have been removed from the Water and Sewer Fund. The advance refunding during 1996 resulted in a difference between the reacquisition price and the net carrying amount of the old debt of approximately \$2,500,000. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2028 using the effective-interest method. The refunding increased the total debt service payments over the next 30 years by approximately \$8,600,000 and produced an economic gain of approximately \$260,000.

Series 1997 Water and Sewerage Revenue Bonds

In 1997, the Government issued \$5,900,000 in Series 1997 Water and Sewerage Revenue Bonds. A portion of the proceeds from the sale of these bonds was used to advance refund all of the former Richmond County's Series 1986 Water and Sewerage Revenue Bond. Proceeds of approximately \$5,600,000 plus an additional \$900,000 of sinking fund monies from the defeased issues were used to purchase U.S. government securities. Those securities were deposited in an irrevocable trust fund with an escrow agent to provide for all future debt service payments on the above-mentioned bonds. As a result, the bonds are considered defeased and the liability for those bonds have been removed from the Water and Sewer Fund. The advance refunding during 1997 resulted in a difference between the reacquisition price and the net carrying amount of the old debt of approximately \$540,000. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2021 using the effective-interest method. The refunding will increase total debt service payments over the next 24 years by approximately \$2,100,000 and will produce an economic gain of approximately \$110,000.

As of December 31, 2010, the amount of these defeased debts outstanding but removed from the Water and Sewer Fund is \$350,000.

Revenues Pledged

The Water and Sewer Fund has pledged future water customer revenues, net of specified operating expenses, to repay \$438.1 million remaining in water system revenue bonds issued in 2000, 2002, 2004 and 2007. Proceeds from the bonds provided financing for the construction of making additions, extensions and improvements to the Utilities' water and sewer system. The bonds are payable solely from water customer net revenues and are payable through 2043. Annual principal and interest payments on the bonds are expected to require less than 39.9 percent of net revenues. The total principal and interest remaining to be paid on the bonds is \$845.2 million. Principal and interest paid for the current year and total customer net revenues were \$27.6 million and \$69.1 million, respectively.

The Augusta Regional Airport has pledged certain future revenues to repay \$19,605,000 in Airport Revenue Bonds issued in 2005. Proceeds from the bonds provided financing for the acquisition, construction and installation of a new airline passenger terminal and certain other capital improvements.

Note 3 – Detailed notes on all funds (Continued)

The Airport Passenger Facility Charge and General Revenue Bonds Series 2005A and 2005B are payable through 2035 primarily from Passenger Facility Charge No. 99-01-C-AGS approved by the Federal Aviation Administration in 2004. Should the proceeds of the Passenger Facility Charge not be sufficient to pay when due interest and principal on Series 2005A and 2005B, the interest and principal shortfall will be paid from Airport Net General Revenues, derived by the Government from the ownership and operation of the Airport, remaining after the payment of expenses of operating, maintaining, and repairing the Airport (“Net General Revenues”), and (2) those passenger facility charge revenues that are allocable to the 2005 Project (“PFC Revenues”). The total principal and interest remaining to be paid on the Series 2005A and 2005B Revenue Bonds was approximately \$28,044,000 as of December 31, 2010. There were no principal payments in the current year, while interest paid was approximately \$699,000. Total Passenger Facility Charge revenue was \$909,816 for the year ended December 31, 2010.

The Series 2005C Revenue Bonds are payable through 2031 solely from and secured by a first priority pledge or and lien on Net General Revenues only. Annual principal and interest payments on the bonds are expected to require less than 35 percent of net revenues through 2012. The total principal and interest remaining to be paid on the bonds was approximately \$12,780,000 as of December 31, 2010. There were no principal payments in the current year, while interest paid was approximately \$338,000. Total net general revenues were \$1,713,292 for the year ended December 31, 2010.

Financial Covenants

Pursuant to the Bond Resolution, the Augusta Regional Airport is subject to meeting certain financial covenants related to the Airport Revenue Bonds. The financial covenants include requirements to (i) provide for 100 percent of the Expenses of Operation and Maintenance and for the accumulation in the Operation and Maintenance Reserve Fund of the Operating Reserve; and (ii) produce Net General Revenues, together with Other Available Moneys, in each fiscal year which will (a) equal at least 125 percent of the Debt Service Requirement on all General Revenue Bonds then outstanding for the sinking fund year ending on the next January 1 and at least 100 percent of the debt service or other amounts payable on all Subordinate Bonds and Other Airport Obligations payable from Net General Revenues then outstanding for the year of computation, (b) enable the Aviation Commission to make all required payments, if any, into the Debt Service Reserve Account, the PFC Debt Service Reserve Account, the Rebate Fund, the Renewal and Replacement Fund and on any Contract or Other Airport Obligation, (c) enable the Aviation Commission to accumulate an amount to be held in the Capital Improvement Fund, which in the judgment of the Aviation Commission is adequate to meet the costs of major renewals, replacements, repairs, additions, betterments, and improvements to the Airport, necessary to keep the same in good operating condition or as is required by any governmental agency having jurisdiction over the Airport, and (d) remedy all deficiencies in required payments from the Revenue Fund from prior fiscal years. As of December 31, 2010 the Airport was in compliance with all covenants.

Urban Redevelopment Agency

Urban Redevelopment Agency of Augusta (Georgia) Taxable Revenue Bonds (Laney Walker and Bethlehem Project, Series 2010:

In June of 2010, the Urban Redevelopment Agency of Augusta issued \$8,000,000 Urban Redevelopment Agency Revenue Bonds, Series 2010. The proceeds of these bonds were used to fund projects of the Laney-Walker and Bethlehem Urban Redevelopment Plan. Interest on the bonds is variable from 1.215% to 3.100%. Interest is payable semiannually on April 1 and October 1 of each year and principal payable annually beginning October 1, 2010 ranging from \$315,000 to \$6,710,000 through October 1, 2015. At December 31, 2010, the amount of principal outstanding was \$8,000,000.

H. Leases

The Government has entered into several long-term lease agreements for various vehicles and machinery and equipment. Although the leases contain clauses which provide that the leases are cancelable if funds are not appropriated for the periodic payments for any future fiscal periods, the leases meet the criteria of a capital lease as defined by Statement of Financial Accounting Standards No. 13 Accounting for Leases and the National Council on Governmental Accounting Statement No. 5 Accounting and Financial Reporting Principles for Lease Agreements of State and Local Governments.

The Government has lease agreements are through the Georgia Municipal Association and are accounted for in an internal service fund. They also have lease agreements other the Georgia Municipal Association agreements that are accounted for within the business-type activities and for governmental activities within the general long-term debt account group.

Future minimum lease payments under the leases and the net present value of the minimum lease payments as of December 31, 2010 are as follows:

	Governmental Activities	Business-type Activities
2011	\$ 683,666	\$ 2,271,590

Interest amounts are not material to the financial statements.

The Government is lessor of terminal space, land and buildings at Augusta Regional Airport at Bush Field and Daniel Field under various operating leases. Revenues and related expenses for Augusta Regional Airport at Bush Field are recorded in the Augusta Regional Airport at Bush Field Fund while the revenue and related expenses for Daniel Field are recorded in the Daniel Field Airport Fund. Some of the leases provide for additional payments based on usage activity in addition to non-cancelable amounts of fixed rates.

During 2010, rental income totaled approximately \$2,398,000 and \$101,000 in the Augusta Regional Airport at Bush Field and Daniel Field Airport Funds, respectively.

Note 3 – Detailed notes on all funds (Continued)

The total interest incurred for the year ended December 31, 2010 was approximately \$25,900,000. Of this amount, approximately \$1,800,000 was capitalized as a component of the cost of capital assets constructed during the year and approximately \$24,100,000 was charged to expense.

Typically, the General Fund has been used to liquidate claims and judgments. Compensated absences are liquidated by the fund which recorded the related salary costs, primarily the General Fund, Fire Protection Fund, and the Water and Sewer System Fund. Capital leases are liquidated by the fund which received the benefit of the related asset.

Department of Health

At June 30, 2010, the Department of Health’s long-term liabilities consisted of obligations for compensated absences and an obligation under capital lease.

Capital lease

The Department has entered into a long-term lease agreement for land and buildings. The lease meets the criteria of a capital lease as defined by Statement of Financial Accounting Standards No. 13 (SFAS 13) *Accounting for Leases*.

The future minimum lease payments under the lease and the net present value of the value of minimum lease payments at June 30, 2010 are as follows:

Amounts were due to other funds primarily for timing of payments from agency funds.

Note 4 – Other information

A. Risk management

The Government is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; and natural disasters for which the Government is self-insured. The Risk Management Funds (an internal service fund) are utilized by the Government to account for and finance its self-insured risks of loss. The Risk Management Funds are maintained to provide general liability insurance, workers' compensation coverage, and unemployment coverage. The Government is self-insured for workers' compensation coverage through a self-insurance program that is administered under contracts with a third party administrator. Future claims can be paid from designated funds established in 1987 from previously unrestricted-unreserved funds. Balances as of December 31, 2010, include the following:

General Fund - undesignated	\$ 2,156,790
General Fund – Transit asset reserve	<u>2,548,271</u>
Total General Fund	4,705,061
Fire Protection Fund	250,000
Risk Management Fund	<u>1,008,865</u>
Total reserve	<u>\$ 5,963,926</u>

Related liabilities are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported (IBNRs). Claim liabilities are calculated considering the effects of inflation, recent claim settlement trends including frequency and amount of payouts and other economic and social factors.

The following represents the changes in the balance of claim liabilities for the Government from January 1, 2009 to December 31, 2010:

Unpaid claims, January 1, 2009	\$ 3,171,222
Incurred claims (including IBNRs)	2,471,780

Transfers are used to move unrestricted revenues in the general fund and nonmajor governmental funds to finance various programs that the Government must account for in other funds in accordance with budgetary authorizations, including amounts provided as subsidies for nonmajor governmental funds, nonmajor enterprise funds and internal service funds.

B. Contingent liabilities

Litigation

The Government is party to various legal proceedings which normally occur in governmental operations. The Government follows the practice of recording liabilities resulting from claims and legal actions only when they become probable and measurable. The Government has accrued a liability in the Risk Management Fund (an internal service fund) for all claims for which a loss is probable and measurable.

Possible unasserted claims

The Government participates in a number of Federal and state assisted grant programs, which are subject to program compliance audits under the Single Audit Act Amendments of 1996. An audit of these programs has been performed for the year ended December 31, 2010, in compliance with the Single Audit Act Amendments of 1996 and OMB Circular A-133. However, the audit is pending final acceptance by the various grantor agencies. The amount, if any, of expenditures, which may be disallowed by the granting agencies, is expected to be immaterial.

C. Contracts and commitments

Augusta-Richmond County Coliseum Authority

The Government has committed to provide funds to service the Augusta-Richmond County Coliseum Authority's debt to the extent of the 50% Hotel-Motel Excise Tax and 30% of the Beer Tax collected.

D. Richmond County Public Facilities, Inc.

The Richmond County Public Facilities, Inc. is a nonprofit organization, tax exempt under Internal Revenue Code Section 501(c)(3). The purpose of this nonprofit organization is to construct and maintain buildings and equipment to be leased by the Government, the Department of Family and Children Services, and the Richmond County Board of Education. The Richmond County Public Facilities, Inc. is part of the reporting entity of Augusta, Georgia, due to the degree of control the Government has over the Board of Directors of Richmond County Public Facilities, Inc.

Richmond County Public Facilities, Inc. issued Certificates of Participation to provide funds for the Government to refund the 1990 Certificates of Participation issue and for certain capital projects. The related assets are included in the financial statements of the Government in the governmental activities. The Certificates of Participation were retired during 2001.

AUGUSTA, GEORGIA

Note 4 – Other information (Continued)

In addition, the Richmond County Public Facilities, Inc. issued Certificates of Participation of \$13,240,000 for the Richmond County Board of Education in a prior year. These Certificates of Participation are the sole responsibility of the Richmond County Board of Education and the related assets and liabilities have not been included in the financial statements of the Government.

Note 5 – Pension plans

A. Plan descriptions, contribution information and funding policies

The Government has six single-employer pension plans and one agent multiple-employer pension plan currently in existence. The Government has a single-employer post-retirement plan that provides medical and death benefits to eligible retirees and their spouses. These plans are defined benefit plans. The Government also has a single-employer, defined contribution plan. The following is a summary of funding policies, contribution methods, and benefit provisions for each plan.

Single-employer pension plans

1945 Plan

The 1945 Plan was available to all former Richmond County employees hired prior to October 1, 1975 that met the Plan's age and length of service requirements. Participants in the Plan who retired at or after age 60 are entitled to a monthly benefit equal to 2% of average earnings multiplied by years of service. Also, the benefit is not to exceed 60% of the average earnings. The Plan provides death and disability benefits. These benefit provisions and all other requirements including amendments are established by Government ordinance. The Plan also provides for reduced benefits if the participant elects to retire after attaining age 50 and completing 15 years of service. Employees are required to make contributions to the Plan equal to 5% of earnings. The Government is required to contribute the remaining amounts necessary to fund the Plan. If a participant terminates employment prior to completion of ten years of credited service, the participant receives a lump-sum amount equal to his total contributions to the Plan, with 5% interest computed from January 1, 1997. After completion of at least ten years of credited service, the participant receives a monthly benefit deferred to his normal retirement date, equal to the benefit computed as for normal retirement multiplied by the percentage based on completed years of credited service, as follows: 50% after 10 years, increasing 10% each year to 100% after 15 years of credited service. This is a closed retirement plan (new employees may not participate in the Plan). The 1945 Plan does not issue a stand-alone financial statement report.

The funding policies for the 1945 Plan provides for actuarially determined periodic contributions at rates that, for individual employees, remain stable over time so that sufficient assets will be available to pay benefits when due. The attained age aggregate cost method has been used to compute the normal cost for the plan. Any unfunded plan costs are spread over the average future working lifetime of the participants as a level percentage of payroll. The significant actuarial assumptions used to compute pension contribution requirements are the same as those used to determine the standard measure of the pension obligation.

General Pension Plan, Policemen's Pension Plan, Firemen's Pension Plan and the City Employees' Pension Plan

These Plans covered former City of Augusta employees. Policemen and firemen hired before 1945 are covered under the General Pension Plan. Policemen hired between 1945 and 1949 are covered under the Policemen's Pension Plan. Firemen hired between 1945 and 1949 are covered under the Firemen's Pension Plan. Other former City of Augusta employees hired between 1945 and 1949 are covered by the City Employees' Pension Plan. Pension benefits are being paid under these Plans to retired employees and beneficiaries. These are closed retirement plans (new employees may not participate in the plans). These plans do not issue stand-alone financial statement reports.

Note 5 – Pension plans (Continued)

General Retirement Plan

Employees hired after March 1, 1949 and before March 1, 1987, whose age did not exceed thirty-five years at the time of their employment and are not participants of the 1977 Plan are covered under the General Retirement Plan. Pension benefits vest after an employee is 45 years of age and has 15 years of full-time employment. An employee may retire at age 60 with 25 years of service and receive annual pension benefits equal to 2% of the employee's average salary earned during the last three years of employment, multiplied by the number of full-time years of employment. The Plan provides death and disability benefits. These benefit provisions and all other requirements including amendments are established by Government ordinance. All full-time employees hired before July 1, 1980, must contribute 8% of gross earnings to the Plan, with the Government contributing remaining amounts sufficient to provide future pensions. This is a closed retirement plan (new employees may not participate in the Plan). The General Retirement Plan does not issue a stand-alone financial statement report.

Employer contributions are determined as part of the January 1, 2011 actuarial valuation using the frozen entry age cost method. The unfunded accrued liability is composed of pieces that are amortized over various periods to comply with Georgia law as a level percentage of payroll. When the actuarial value of assets exceeds 150% of the present value of accrued benefits, the Official Code of Georgia Annotated states that there is no minimum required contribution. The significant actuarial assumptions used to compute pension contribution requirements are the same as those used to determine the standard measure of the pension obligation.

Agent multiple-employer pension plan

Georgia Municipal Employees Benefit System (GMEBS)

Employees hired after March 1, 1987 and before consolidation on December 31, 1996, and who were not participants in any other employer-sponsored retirement plan are covered under the Georgia Municipal Employees Benefit System. The Plan provides pension benefits, deferred allowances, and death and disability benefits. These benefit provisions and all other requirements including amendments are established by Government ordinance. A participant may retire after reaching the age of 65 if the participant is not classified as public safety personnel; participating public safety personnel may retire at age 65 or age 55 with 25 years of total credited service, whichever is earlier. Early retirement may be taken at age 55 with 10 years of credited service. Benefits vest after 10 years of service. Employees who retire at or after age 55 with 10 or more years of service are entitled to pension payments for the remainder of their lives equal to 1 ¼% of their final five-year average salary times the number of years of which they were employed as a participant in the GMEBS. The final five-year average salary is the average salary of the employee during the final five years of full-time employment. Pension provisions include deferred allowances, whereby an employee may terminate his or her employment with the Government after accumulating 10 years of service but before reaching the age of 55. If the employee does not withdraw his or her accumulated contributions, the employee is entitled to all pension benefits upon reaching the age of 55. Employees must contribute 3.5% of their gross earnings to the Plan. In addition, the Government must provide annual contributions sufficient to satisfy the actuarially determined contribution requirements as amended by GMEBS. The GMEBS Retirement Fund issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to Georgia Municipal Employees Benefit System, 201 Pryor Street, SW, Atlanta, Georgia 30303.

The employer contributions are determined as part of a July 1, 2010 actuarial valuation using the projected unit credit actuarial cost method. The actuarial value of plan assets are computed with a smoothing method that uses a roll forward of prior year's actuarial value with contributions, disbursements, and expended return of investments, plus 10% of investment gains (losses) during 10 prior years. Normal cost is funded on a current basis. The Plan is subject to the minimum funding standards of the Public Retirement Systems Standards Law. Since the Government's policy is to contribute the pension expense in each year, the funding strategy should provide sufficient resources to pay employee pension benefits on a timely basis. The significant actuarial assumptions used to compute pension contribution requirements are the same as those used to determine the standardized measure of the pension obligation. The plan's unfunded actuarial accrued liability is being amortized over 30 years as a level dollar.

Defined contribution plan

Augusta-Richmond County Board of Commissioners Retirement Savings Plan (the “1998 Plan”)

All full-time employees with more than one month of service are eligible to participate in the Retirement Savings Plan. The Plan is a defined contribution plan under Section 401(a) of the Internal Revenue Code, and is administered by Nationwide Life Insurance, PPA support. The Plan was organized and may be amended by a majority vote of the full-body of the governing board, the Augusta-Richmond County Commission. Employees contribute four percent (4%) of their salary, and the Government contributes two percent (2%) of the employee’s salary. Contribution requirements may be amended by a majority vote of the full-body of the governing board, the Augusta-Richmond County Commission. At December 31, 2010, there were approximately 258 plan participants. Participants are considered fully vested in the Government’s contributions after completing five (5) years of service. For the year ended December 31, 2010, the employees’ contributions were \$383,823, and the Government’s contributions were \$191,911. This is a closed retirement plan (new employees may not participate in the Plan).

Richmond County Department of Health – General Retirement Plan

All current full-time employees of the Department of Health participate in the Employees’ Retirement System of Georgia (ERS), which is a cost-sharing multi-employer, defined benefit, public employee retirement system. The Department contributes at a specified percentage of active members payroll determined by actuarial valuation. The contribution requirements of plan members and the Department are established and may be amended by the ERS Board of Trustees. Retirement contributions made on behalf of eligible participants for the year ended June 30, 2010 were \$580,599. Members become fully vested after ten years of service.

B. Summary of significant accounting policies

Basis of Accounting

Pension trust funds are accounted for on the accrual basis. The accrual basis of accounting recognizes revenues when earned. Expenses are recorded when incurred. Plan member contributions are recognized in the period in which the contributions are due. Employer contributions are recognized when due and the Government has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. For information relating to reported investment values, see Note 1 G.

Method used to Value Investments

Investments are reported at fair value. Money market mutual funds are reported at cost, which approximates fair value. Securities traded on national or international exchanges are valued at the last reported sales price or exchange rate. Net appreciation (depreciation) in fair value of investments includes the difference between cost and fair value of investments held as well as the net realized gains or losses from securities sold. Interest and dividend income is recognized on the accrual basis when earned. Purchases and sales of investments are recorded on a trade date basis.

C. Concentrations and reserves

There are no assets legally reserved for purposes other than the payment of plan member benefits for any plans.

The plans held no individual investments whose market value exceeds five percent or more of net assets available for benefits. There are no long-term contracts for contributions.

The aggregate actuarial cost method is used to determine the annual required contribution of the employer for the General Retirement Pension Plan (City 1949). Because the method does not identify or separately amortize unfunded actuarial liabilities, information about the Plan's funded status and funding progress has been prepared using the entry age actuarial cost method for that purpose, and the information presented is intended to serve as a surrogate for the funded status and funding progress of the Plan.

The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability.

F. Post-employment retirement benefits

Plan description. Augusta-Richmond County sponsors a single-employer post-retirement plan provides medical and death benefits to eligible retirees and their spouses.

Annual OPEB cost and net OPEB obligation. The Government's annual other post-retirement benefit (OPEB) cost (expense) is calculated based on the annual required contribution of the employer (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed 30 years. The following table shows the components of the Government's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the Government's net OPEB obligation:

Components of net OPEB obligation	
Annual required contribution	\$ 7,735,722
Interest on net OPEB obligation	789,286
Adjustment on annual required contribution	(987,410)
Annual OPEB cost (expense)	<u>7,537,598</u>
Contributions made or accrued	<u>(2,318,304)</u>
Increase in net obligation	<u>\$ 5,219,294</u>
Net OPEB obligation (beginning of year)	\$ 14,350,656
Net OPEB obligation (end of year)	\$ 19,569,950

AUGUSTA, GEORGIA

Notes to Financial Statements – Continued

Year Ended December 31, 2010

Note 5 – Pension plans (Continued)

The Government's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for 2010 is as follows:

<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of OPEB Cost</u>	<u>Net OPEB Obligation</u>
12/31/2010	\$ 7,537,598	30.8%	\$ 19,569,950
12/31/2009	6,958,580	16.4%	14,350,656
12/31/2008	7,064,158	16.2%	8,534,019

Funding policy. The Government intends to continue to fund the OPEB on an actual pay-as-you-go expense. OPEB is fully funded by the Government and plan members are not required to contribute. Contribution requirements may be amended by a majority vote of the full-body of the governing board, the Augusta-Richmond County Commission.

Funded status and funding progress. As of January 1, 2010, the most recent actuarial valuation date, the plan was 0% funded. The actuarial accrued liability for benefits was \$91,479,290 and the actuarial value of assets was \$0, resulting in an unfunded actuarial accrued liability (UAAL) of \$ 91,479,290.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Actuarial methods and assumptions. Projections of benefits for financial reporting purposes are based on substantive plan (the plan as understood by the employer and the plan members) and includes the type of benefits provided at the time of each valuation and the historical pattern of sharing the benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the January 1, 2010 actuarial valuation, the projected unit credit actuarial cost method was used. The actuarial assumptions include a 5.5% investment rate of return (net of administrative expenses), based on the employer's own investments and used to discount liabilities at the valuation date, and an annual healthcare cost trend rate of 8% initially, reduced by decrements to an ultimate rate of 5% after three years. The UAAL is being amortized as a level percentage of payroll on an open basis. The remaining amortization period at January 1, 2010 was 27 years.

Note 6 – Joint venture and related organization

Joint venture

Under Georgia law, the Government, in conjunction with the sixteen counties and fifty-four cities in east Georgia known as the Central Savannah River Area (CSRA), is a member of the CSRA Regional Development Center (CSRA RDC). The CSRA RDC is a public organization that assists local governments in planning for common needs, cooperating for mutual benefit, and coordinating for sound regional development. The operations are mainly financed by membership dues and financial assistance provided by the State of Georgia. Membership in the CSRA RDC is required by the Official Code of Georgia Annotated (O.C.G.A.) §58-8-34 with annual dues based on a per capita amount. During the year ended December 31, 2010, the Government paid \$193,270 in such dues, which was based on a per capita amount of \$1.00. The CSRA RDC Board membership is composed of one city official, one county official, and one private sector individual from each county. O.C.G.A. §58-8-39.1 provides that the Government is liable for any debts or obligations of the CSRA RDC. The Comprehensive Annual Financial Report of the CSRA RDC may be obtained from:

Note 6 – Joint venture and related organization (Continued)

Related organization

The Government officials are responsible for appointing the members of the boards of another organization, but the Government's accountability for these organizations do not extend beyond making the appointments. The Government commission appoints the voting majority of the members of the Augusta-Richmond County Coliseum Authority and the Housing Authority of the City of Augusta, Georgia.

Note 7 – Hotel/motel lodging tax

The Government has levied a 6% lodging tax. A summary of the transactions for the year ended December 31, 2010 follows:

Lodging tax receipts	\$ 3,969,575
Disbursements to the Augusta-Richmond County Coliseum Authority and the Augusta Convention and Visitors Bureau -for promotion of tourism	(3,706,039)
	<hr/>
Balance of lodging tax funds on hand at end of year	\$ <u>263,536</u>

The Government has received audit reports from the Augusta-Richmond County Coliseum Authority and the Augusta Convention and Visitors Bureau, covering the lodging tax monies. The subcontractor's expenditures were for promotion of tourism as required by O.C.G.A. §48-13-51.

Note 8 – Significant contingencies

Federal and State assisted programs

The Government has received proceeds from several federal and state grants. Periodic audits of these grants are required and certain costs may be questioned as not being appropriate expenditures under the grant agreements. Such audits could result in the refund of grant monies to the grantor agencies. Management believes that any required refunds will be immaterial. No provision has been made in the accompanying financial statements for the refund of grant monies.

Arbitrage

The Government's bond issues are subject to federal arbitrage regulations, and the Government has elected to review its potential arbitrage liability annually on the bond issue dates. The arbitrage rebate payments are payable on the fifth anniversary of the bond issue date and every fifth year subsequent to the date. As of December 31, 2010, the estimate arbitrage payable of \$1,566,303 has been included in claims and judgments in the accompanying financial statements.

Note 9 – Expenditure of federal grant funds

General deficiencies applicable to all federal grants have been identified, and specific deficiencies have been identified for grants from the U. S. Department of Housing and Urban Development, U. S. Department of Justice, and the U. S. Department of Transportation, all of which are more fully described in the City's Single Audit report for the year ended December 31, 2010. These deficiencies may result in federal claims for refunds for these grants. The City has not estimated or recorded a liability for any potential claim.

Note 10 – New accounting pronouncements

GASB issued GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, which, among other things, enhances the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied and by clarifying the existing governmental fund type definitions. This Statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. The requirements of this Statement are effective for financial statements for periods beginning after June 15, 2010. The Government's management is currently evaluating the impact GASB No. 54 will have on the Government's financial statements.
